

COMPANY BROCHURE

M&T Global is a premier construction company dedicated to delivering superior-quality projects. Our expertise spans residential and commercial buildings to infrastructure development, providing comprehensive end-to-end construction services.

Formed through a partnership of M&T Home Improvement, Daggas Construction, Tresor Interior, and Structures Enterprise, along with local and international investors, M&T Global has successfully operated in Maryland, Washington DC, and South Carolina for the past decade. We have experience in both small and large-scale construction, repair, and alteration projects.

With the growing need for professional-standard infrastructural development and advancements in technology, we rebranded from M&T Construction LLC to M&T Global Construction Group LTD. This change reflects our ambition to expand globally, starting with the Gambian market, and with mid-term and long-term goals to reach West Africa and the entire African continent.

Global Vision. Excellent Delivery.

> VALUES

We are committed to delivering superior-quality projects that exceed client expectations, embracing innovative construction methods, and building trust through transparency, reliability, and ethical practices. We foster strong partnerships with local and international stakeholders, continuously expanding our reach and expertise to meet global infrastructural needs.

> OBJECTIVES

To deliver superior-quality construction projects globally, leveraging innovative techniques and strategic partnerships to meet the evolving infrastructural needs of our clients, with a special focus on expanding our presence in Africa.

> MISSION

Our mission is to help all those who walk through our doors – governments, the private sector and individuals – in Africa and throughout the world realize their dreams of building world-class structures that address their needs and can compete on a global stage with the best in the construction industry.

> VISION

Our vision is to shape the construction landscape in Africa and globally by collaborating with clients in innovative ways, pushing the boundaries of architecture and construction possibilities.
